PROFESSIONAL SUMMARY

Junior AI/ML Consultant with approximately 1.6 months of hands-on professional experience in building AI-powered applications using Large Language Models (LLMs), Natural Language Processing (NLP), and Retrieval-Augmented Generation (RAG). Demonstrated ability to develop intelligent automation solutions including product description generators, AI chatbots, MCQ generation pipelines, and document verification APIs. Proficient in Python, FastAPI, and cloud-based AI services such as Azure AI Document Intelligence. Experienced in web scraping, data structuring, and integrating AI/ML modules into scalable backend workflows. Eager to contribute technical expertise in AI application development while continuing to grow in a collaborative environment.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Backend Development: FastAPI, Flask, REST API, Node.js, Express.js

Databases: SQL (Query Optimization), DB2, PostgreSQL, Supabase

AI / ML: Machine Learning, NLP, RAG, LLM Applications, TensorFlow, Hugging Face

Cloud & APIs: Azure AI Document Intelligence (Form Recognizer), OpenAI API

Developer Tools: Git, Postman, API Integration, Web Scraping, API Configuration

WORK EXPERIENCE

AI Mukarramah Consulting Service India Pvt Ltd (T57.ai) | *AI/ML Consultant*

May 2025 – Present

- Developed AI-powered product description generation using **NLP** and **Large Language Models (LLMs)** to automate product listing workflows.
- Implemented an AI-based **Terms and Conditions generator**, streamlining compliance content creation for product listings.
- Built AI-generated product summaries to improve product discovery and enhance overall user experience.
- Developed and maintained **scraping automation pipelines** for collecting and structuring large-scale product data for downstream AI workflows.
- Designed and implemented a **RAG-based support chatbot**, building retrieval pipelines and integrating module payloads for end-to-end response workflows.
- Developed a **Document Verification API** using **Azure AI Document Intelligence (Form Recognizer)** for automated business document extraction and verification.

Maskan Technologies | *AI/ML Junior Consultant*

Feb 2025 – May 2025

- Contributed to the development of **Dr. Max**, an AI-powered learning platform for medical exam preparation.
- Supported development of AI chatbot workflows using **LLM-based question answering** for domain-specific educational content.
- Worked on **MCQ generation modules** and **NLP pipelines** for educational content automation.
- Assisted in integrating AI components and backend APIs into application workflows, ensuring scalability and reliability.
- Collaborated in testing, debugging, and improving AI model responses for better accuracy and improved user experience.

SELECTED PROJECTS

AI-Powered Trade & Product Intelligence Platform | Python, LLM, FastAPI, Web Scraping May 2025 – Present

- Contributed to an AI-driven global trade platform connecting **B2B, B2G, and G2G** ecosystems, supporting product intelligence and digital trade workflows.
- Developed AI-powered product description generation, product summaries, and intelligent listing automation using NLP and LLMs.
- Built and maintained data scraping pipelines to collect and structure product data for downstream AI/ML workflows.
- Supported backend integration of AI modules through RESTful APIs for scalable and maintainable business applications.

Dr. Max – AI-Based Medical Exam Preparation Platform | Python, LLM, NLP, FastAPI Feb 2025 – Present

- Contributed to development of an AI-powered learning platform for medical exam preparation, supporting LLM-based Q&A and MCQ generation.
- Worked on AI-driven MCQ generation and NLP-based content automation for educational use cases.
- Assisted in integrating AI models and backend components into application workflows.

Anomaly Detection & Criminal Face Analysis | Python, OpenCV, TensorFlow

- Developed an advanced security system integrating anomaly detection and facial recognition using **Python** and **TensorFlow** for real-time analysis.
- Applied ML-based facial recognition algorithms to detect suspicious activities with high accuracy in live video streams.
- Implemented real-time monitoring and alert systems, optimizing algorithms for high-performance processing.

EDUCATION

Bachelor of Technology – Information Technology

Aug 2020 – May 2024

M.A.M. College of Engineering (Affiliated to Anna University) – Trichy, TN

CERTIFICATIONS

- Machine Learning I | Columbia+ | 2026
- Full Stack Java Development | Bangalore Tap Academy | 2024
- Generative AI | LinkedIn Learning & NASBA
- SQL (Intermediate) | HackerRank
- Big Data Analytics | Veranda Learning
