

USAIDHUSSAIN A

AI/ML Engineer | LLMs · RAG · Agentic Systems · Production AI

+91-8870501622 | usaidhussainit2020@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Applied AI/ML Engineer with hands-on experience building production Generative AI applications using LLMs, RAG pipelines, prompt engineering, NLP, and agentic systems. Experience spans market and price intelligence, RFQ/bidding and negotiation-support workflows, document intelligence, and enterprise copilots. Contributed to T57.ai, an AI-driven integrated food ecosystem, building AI-powered features across procurement, pricing, product intelligence, and business workflows. Skilled in Python, FastAPI, vector databases (FAISS, Qdrant, Pinecone, ChromaDB), and cloud AI services (Azure; working knowledge of AWS/GCP), with a track record of taking AI features from prototype to production.

CORE COMPETENCIES

LLM Application Development ▪ RAG Pipeline Design ▪ Agentic AI Systems ▪ Prompt Engineering ▪ Market & Price Intelligence ▪ RFQ / Bidding & Negotiation Workflows ▪ Document Intelligence (Azure) ▪ NLP & Content Automation ▪ FastAPI & REST Backend Dev ▪ Vector DBs (Qdrant, FAISS, Pinecone, ChromaDB) ▪ Cloud AI (Azure; working knowledge of AWS/GCP) ▪ Rapid Prototyping & Delivery

WORK EXPERIENCE

AI/ML Consultant | Al Mukarramah / T57.ai

May 2025 – Present

- Contributed to AI-powered market and price intelligence capabilities, analyzing market data, pricing trends, and product-level information to support procurement and business decision-making.
- Built components of AI-driven RFQ, bidding, and quotation workflows, enabling intelligent comparison of supplier quotations to support data-driven purchasing decisions.
- Contributed to AI-assisted negotiation workflows, integrating LLM-based reasoning over structured quotation data to help users evaluate and negotiate commercial terms.
- Developed components of T57 Copilot, an AI assistant providing contextual business intelligence across food procurement and marketplace workflows.
- Contributed to T57.ai's AI-driven integrated food ecosystem, connecting product, supplier, pricing, procurement, and intelligence workflows through scalable backend and AI services.
- Built and deployed a RAG-based support chatbot end-to-end — designed retrieval pipelines using vector databases (Qdrant, Pinecone, ChromaDB), integrated domain knowledge, and shipped production-ready response workflows.
- Developed a Document Verification API using Azure AI Document Intelligence (Form Recognizer) for automated extraction and verification of business documents.
- Built LLM-powered content generation pipelines for product descriptions, summaries, and commercial terms & conditions.
- Designed and maintained data scraping and structuring pipelines to collect and prepare market/product data for downstream AI and intelligence workflows.
- Integrated AI capabilities into FastAPI-based REST services, owning features from prototyping through production deployment.

AI/ML Junior Consultant | Maskan Technologies

Feb 2025 – May 2025

- Contributed to Dr. Max, an AI-powered healthcare learning platform for medical exam preparation.
- Built LLM-based Q&A systems and MCQ generation pipelines for domain-specific medical educational content using NLP automation.
- Integrated AI components and backend APIs into application workflows, ensuring scalability and accuracy of model responses under real user load.
- Collaborated on testing, debugging, and iterating on AI model outputs to improve accuracy in a high-stakes educational domain, building discipline around evaluation and guardrails.

KEY PROJECTS

T57 Copilot – AI Business Intelligence Assistant

May 2025 – Present

T57.ai | Python, LLM, Agentic Workflows, FastAPI

- Built and integrated copilot components that surface contextual product, pricing, and supplier intelligence across food procurement and marketplace workflows.

Market & Price Intelligence

May 2025 – Present

T57.ai | Python, LLM, Data Pipelines

- Contributed to AI capabilities analyzing market data, pricing trends, and product-level information, backed by data scraping/structuring pipelines, to support procurement decisions.

RFQ / Bidding & Negotiation Intelligence

May 2025 – Present

T57.ai | Python, LLM Reasoning, FastAPI

- Built components of AI-driven RFQ and bidding workflows for supplier quotation comparison, and contributed to LLM-based negotiation-support features.

RAG-Based Support Chatbot

May 2025 – Present

T57.ai | Python, RAG, LLMs, Qdrant, Pinecone, ChromaDB

- Designed retrieval pipelines and integrated knowledge bases end-to-end into a production chatbot system, from retrieval design through response generation.

Document Verification API

May 2025 – Present

T57.ai | Python, Azure AI Document Intelligence, FastAPI

- Designed and shipped an automated document extraction/verification API using Azure Form Recognizer, integrated into a scalable RESTful backend for B2B deployment.

Dr. Max – AI-Powered Medical Exam Preparation Platform

Feb 2025 – Present

Python, LLM, NLP, FastAPI

- Built LLM-based Q&A and MCQ generation pipelines for medical exam content, with NLP-driven content automation integrated into production backend APIs.

Additional Project

- Anomaly Detection & Criminal Face Analysis (Python, OpenCV, TensorFlow, Feb–May 2024) — real-time security system combining anomaly detection and facial recognition with live video stream processing.

TECHNICAL SKILLS

AI / ML	LLMs, RAG, NLP, Agentic Systems, TensorFlow, Hugging Face, Prompt Engineering, Evals
Applied Domains	Market & Price Intelligence, RFQ/Bidding, Negotiation-Support Workflows, Document Intelligence, Medical NLP
Vector Databases	Qdrant, FAISS, Pinecone, ChromaDB, PgVector
Backend	FastAPI, Flask, REST API, Node.js, Express.js
Cloud & APIs	Azure AI Document Intelligence, OpenAI API Working knowledge of AWS, GCP
Databases	PostgreSQL, Supabase, SQL, DB2
Languages	Python, Java, JavaScript
Dev Tools	Git, Postman, Web Scraping, API Integration

EDUCATION

B.Tech – Information Technology | M.A.M. College of Engineering, Anna University – Trichy, TN | Aug 2020 – May 2024

CERTIFICATIONS

- Machine Learning I | Columbia+ | 2026
- Generative AI | LinkedIn Learning & NASBA
- Full Stack Java Development | Bangalore Tap Academy | 2024
- SQL (Intermediate) | HackerRank
- Big Data Analytics | Veranda Learning
